FIREWOOD GRAPPLES

POLY

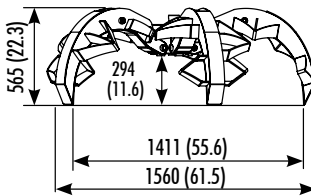

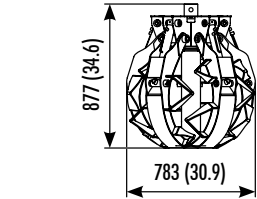

I polipi forestali della serie POLY sono progettati specificamente per la movimentazione efficiente della legna tagliata e delle ramaglie.

Firewood Grapple range POLY is specifically conceived for a well-run handling of cut wood and branches.

POLY 150

	Kg. (lb.)	300 (661.5)
	N.	5
	Kg. (lb.)	140 (308.7)
	lt. (gal)	120 (31.7)
	MAX bar (psi)	200 (2900.8)
	lt. (gal)	30 (7.9)

POLY 300

	Kg. (lb.)	600 (1323.0)
	N.	5
	Kg. (lb.)	260 (573.3)
	lt. (gal)	285 (75.3)
	MAX bar (psi)	200 (2900.8)
	lt. (gal)	60 (15.9)

POLY 400

	Kg. (lb.)	700 (1543.5)
	N.	5
	Kg. (lb.)	335 (738.7)
	lt. (gal)	405 (107.0)
	MAX bar (psi)	200 (2900.8)
	lt. (gal)	60 (15.9)

Questi polipi possono essere facilmente montati su gru forestali, escavatori, sollevatori telescopici, caricatori frontali e altre attrezzature, offrendo una versatilità che si adatta a molteplici esigenze operative.

Our Poly Grapples can be adjusted on forestry loaders, excavators, telescopic lifters, front loaders and other machines, making them fit for several operative needs.

Una caratteristica distintiva della serie POLY è l'impianto idraulico completamente integrato all'interno del corpo, eliminando la necessità di tubi idraulici esterni che potrebbero essere soggetti a danni o rotture, garantendo così maggiore sicurezza e affidabilità durante l'uso.

A hallmark of POLY is the position of the hydraulic system, housed inside the frame structure to avoid breakages that could occur with hoses placed outside so granting higher safety and reliability.

Costruiti con materiali di altissima qualità, come lamiere in S 700, perni in acciaio 39NiCrMo3 e boccole con bronzine, i polipi forestali AGRIFOREST assicurano robustezza, durabilità e prestazioni meccaniche eccellenti anche nelle condizioni più difficili.

AGRIFOREST Poly-grapple are built with first rate materials such as S 700 iron plates, steel studs 39NiCrMo3, bushings bronzed inside ensuring strength, top mechanical performances and a long-lasting durability even in the harshest conditions.
